

# Bamiduro Eniola Gabriel

FULL-STACK ENGINEER · SYSTEMS & INFRASTRUCTURE · AI-INTEGRATED PRODUCTS

bamiduroeniolagabriel@gmail.com · +234 706 904 7498 · Lagos, Nigeria · GitHub · LinkedIn · gbt3k.com

## PROFILE

Full-stack developer with 7 years of experience shipping production systems end to end - from custom WordPress themes and PHP backends to containerised Django/Next.js platforms with CI/CD. Builds with a consistent modular structure across every layer, with formal training in AI workflow automation (n8n, Make, Zapier) at TS Academy.

## EXPERIENCE

### Full-Stack Developer / Freelance Consultant

Jun 2025 - Present

*flipall.co*

- Brought in after users were being scammed through a rogue chat left by the previous dev - rebuilt the chat system from scratch with admin-mediated messaging, blocked all off-platform redirects, and made admin the trusted intermediary for every transaction conversation
- Overhauled the entire frontend with a new UI and added multi-currency support with automatic geo-detection
- Migrated the platform to a VPS with custom Nginx and aaPanel configuration, sustaining **2k+ daily active sessions** with no downtime incidents
- Platform now serves **100k+ monthly pageviews** and **30k+ users**; retained as freelance consultant in February 2026 and cut WordPress frontend asset size from **9.7MB to 156KB**

### Web Developer & Server Administrator

2024 - Present

*Vestercapital*

- Stepped in within **48 hours** to rescue the company website from going offline; rebuilt it with improved features and faster load times
- Set up and fully manage their VPS, web hosting, and custom email infrastructure (Dovecot, Postfix) - ongoing server maintenance, security hardening, and uptime monitoring
- Built a custom WordPress theme from scratch for their financial news blog (wealthyandpoor.com) - designed the UI first, then wired fully with PHP using a modular component structure, with schema markup and on-page SEO throughout; site now drives **1k+ daily visitors** and earned Google sitelinks

### WordPress Developer

2019 - Present

*Freelance - Music Blog Platforms*

- Built and maintained custom WordPress themes and plugins for multiple music blog clients across Nigeria - handling UI design, performance tuning, and hosting management end to end

## PROJECTS

### **LaunchStack**

Node.js, CLI - published on npm · **729 weekly downloads**

A published npm CLI tool that scaffolds the foundation of a Node.js project before you write a single line of code. Detects your environment, walks you through stack selection, and generates the folder structure, config files, and wired dependencies ready to go. Supports multiple backends, frontend frameworks, ORMs, auth strategies, and payment providers. Includes an AI-assisted mode that recommends a stack from a plain-language description of your app.

### **InvoiceFlow**

Next.js 16, TypeScript, Turso (libSQL), JWT, html2canvas

A conversation-first invoicing app - describe your services in plain language and the AI structures them into a clean, calculated invoice. Includes a manual editor for fine-tuning, client-side PDF export, and secure shareable short-links. Auth uses stateless JWT with httpOnly guards.

### **Biography Platform**

Django 5, Next.js 16, TypeScript, PostgreSQL, Redis, Docker, GitHub Actions

A full-stack biography publishing platform with a Django REST API backend and Next.js frontend, fully containerised with Docker and wired with a GitHub Actions CI/CD pipeline. Features JWT auth with httpOnly cookies, Claude API integration, DRF rate throttling, Sentry monitoring, and production Nginx routing through aaPanel.

### **GBT3K Portfolio**

Laravel, PHP, Blade, OOP

Personal portfolio and web presence built with Laravel, using OOP architecture and Blade templating. Live at gbt3k.com.

## SKILLS

<b>Backend</b>	PHP, Laravel (OOP, Blade), Python, Django + DRF, Node.js, REST APIs
<b>Frontend</b>	Next.js, React, Vue.js, TypeScript, JavaScript, TailwindCSS, HTML/CSS
<b>Database</b>	MySQL, PostgreSQL, SQLite, Redis, Turso (libSQL)
<b>DevOps &amp; Server</b>	Linux/VPS, Nginx, Apache, Docker, CI/CD, Vercel, aaPanel, Dovecot, Postfix, SSH
<b>CMS</b>	WordPress, Custom Theme & Plugin Development
<b>AI &amp; Automation</b>	n8n, Make, Zapier, Voiceflow, Prompt Engineering, ChatGPT/Claude APIs

## EDUCATION

### **AI & Automation Certificate**

Oct 2025 - Mar 2026

*TS Academy, Birmingham, UK*

AI tools, workflow automation (n8n, Make, Zapier), prompt engineering

### **B.Sc. Fisheries & Aquatic Science**

2019

*Adekunle Ajasin University, Ondo State, Nigeria*
